Pantone

Reflex Blue Plan

---

**When you have finished**

- AVOID bruising. Do not rub the injection site after you have injected the solution.
- Keep the needle from touching any surfaces.
- The needle is sharps and must be disposed of in accordance with local requirements.

**Changing anticoagulant medicine**

- **Changing from CLEXANE to Blood Thinners (oral anticoagulants)**
  - If you stop taking oral anticoagulants before stopping CLEXANE, your doctor may request you perform a blood test to make sure the coagulation is normal. If the test is abnormal, your doctor may request you continue with CLEXANE for a short time before stopping all medicines.
- **Changing from Blood Thinners (oral anticoagulants) to CLEXANE**
  - You will need to consult your doctor before you stop taking oral anticoagulants.

**Possible side effects**

1. **Common** (may affect up to 1 in 10 people):
   - Headache.

2. **Uncommon** (may affect up to 1 in 100 people):
   - Skin reaction (such as rash, difficulty breathing or swallowing, swelling of the mouth or throat).
   - A feeling of tenderness and swelling in your eyes.

3. **Rare** (may affect up to 1 in 1,000 people):
   - An increase in the number of eosinophils in your blood.
   - Tingling, numbness and muscular weakness.
   - An increase in the number of liver enzymes.
   - Strong cramping pain, redness, warmth, or swelling in one area you last injected.

**Changes in your blood test results**

- An increase in your blood counts and some blood test results. Your doctor will be able to check this by carrying out regular blood tests.
- Your blood test results may become abnormal if you have an infection or a fever.

**How to Store CLEXANE**

- Store below 25°C (77°F).
- Keep the medicine out of the reach and sight of children.
- After opening the box, use the medicine within 12 hours of the day the final syringe was removed from the box.

**Changing your dose**

- If you use more CLEXANE than you should:
  - Keep the medicine out of the reach and sight of children.
  - After opening the box, use the medicine within 12 hours of the day the final syringe was removed from the box.

**Information for patients**

- For more information on the possible side effects of CLEXANE, please refer to the leaflet that came with the medicine.
